

TOWN OF BRISTOL

CONSTRUCTION SEASON PREVIEW

CONSTRUCTION PROJECTS 2024 AND 2025

2024 PROJECTS

The map above illustrates the detour routes that will be used both this summer and next year as Bristol and INDOT begin major construction projects that will impact daily traffic in the Bristol area. This summer we plan to start the water infrastructure improvement project. The 2-year project includes the construction of a new water tower and additional water mains which will improve both fire protection capabilities and water pressure. The first phase will be a new water main installed along the south side of main street with new laterals to the businesses on both sides of Main Street. 2024 street paving projects include Indiana Street in front of the elementary school, Maple Street north of the RR tracks and a new Depot/Maple Street intersection. We are seeking grant funding for a paving project to repave sections of East Elkhart, East St Joseph and Apollo streets.

The map illustrates the extent of the INDOT project scheduled for 2025. The red, green, and yellow lines indicate the 3 phases of the project. The project will be a total reconstruction of these sections of SR 15 and SR 120. We are discussing with INDOT the possibility of a traffic control signal on SR 15 south of Town. Our understanding at this point is one-lane for non-commercial traffic will be open in the downtown area during construction. Unless commercial vehicles are making a downtown delivery, all commercial traffic will be routed on the local detour, the blue line on the map. More information will be available later this year as we coordinate construction schedule with INDOT

2025 INDOT PROJECT UPDATE

TOWN OF BRISTOL

2023 LOCAL PROJECTS WRAP-UP

In 2023 we focused paving dollars toward construction of the new railroad crossing on Stonemont, widening and improving Maple Street south of Earthway Dr. to prepare these streets for use as a detour route in 2023 and 2024. The closing of the Maple Street railroad crossing was required by the railroad as part of the new Stonemont crossing project. We understand this created an inconvenience for employees and commercial traffic that utilized this crossing as a shortcut into the Earthway Business Park area. However, keeping it open was not an option. For the residential area north of the tracks, the reduction in commercial traffic volume is welcomed and with new interest in residential development in this general area, the reduced commercial traffic facilitates a safer area for families, the school, library and churches.

BUSINESS ROUTE PROGRESS

BRISTOL INDIANA

CURRENT BRISTOL BUSINESS ROUTE ALTERNATE ALIGNMENT AND IMPROVEMENTS
NOVEMBER 2023

The area circled in blue is now complete. The area circled in red, on both sides of SR 15, is generating development interest and we expect new construction in this area in 2024. The section of Ponderosa circled in green is a Town project. The plan is to relocate Ponderosa to align with the future south-bound business route. Construction will be scheduled after right-of-way acquisition is complete. The business route sections outside the blue and green circle areas are still at a conceptual stage. The majority of the business route is being constructed by developers, landowners and new businesses. The new streets are designed and constructed to our standards and later accepted by the Town. The Town is able to provide incentives to assist in the construction cost, but the initial investments are primarily funded with private dollars, not tax dollars.

A new option for meetings, reunions and family events. The Town has property located on E. St Joseph St. adjacent to Ponderosa Street. The Council and Town Park board is considering this location for a new building to replace the rental facility at Hermance Park. The picture on the left is a concept of a building being considered. We have room for a facility that will seat over 100 people and we plan to design it to be used for family events, park activities and be equipped with AV capability for local business to utilize for training or off-site meetings. The Town is seeking corporate sponsors for the project. If you are interested contact Mike Yoder at Town Hall. 574-298-3331

NEW RENTAL PAVILION
